

SUCCESS STORY OF RKVY ZUNGKI – A, KIPHIRE DURING 2013-14

The foot bridge constructed under RKVY 2013-14 at Zungki A has been the felt need of the farmers, since it connects the farmers from Phelunger village and Kiphire district headquarter and Kisum range. Before the construction of the foot bridge, the farmers had to rely on the self constructed foot bridge made of bamboo and wood which was not very safe and also had to be repaired every coming year. And also the farmers could not carry a large load of their products from their farm to their villages and market out. Keeping in view of the problems faced by the farmers, the DAO Kiphire undertook the task of constructing the foot bridge under RKVY Zungki A for easy mobilization of farmers and also for easy movement of food crops produced from fields to the villages and markets. This has helped the farmers by increasing production, taking up more agricultural activities in the area and fetching additional income of the farmers is the success story of the programme.
